Access information in regards to students courses and prerequisites

Students are assessed in 4 categories. Categories and Assignments are weighted.

Formative Assessment	Performance-Based Assessment
Assessment experiences that result in an ongoing exchange of information between students and teachers about student progress toward learner outcomes. Formative assessment is "assessment for learning" which refers to information not used in evaluation.	A type of summative assessment that moves away from traditional paper-pencil. Students have the opportunity to demonstrate understanding in a variety of ways and/or in a collaborative environment.
Summative Assessment	Final Assessment
The process of collecting and interpreting evidence for the purpose of evaluation. This is also known as "assessment of learning" which refers to information used for evaluation.	A cumulative assessment which gathers information or observable evidence of what the learner can do relative to the learner outcomes as outlined by the Alberta Program of Studies.
